

WHAT IS CLAIMED IS:

1. A basketball practicing and collecting device, comprising:

a base containing a water bag therein;

a first tube having a lower end secured on the base;

5 a lift tube having a lower end retractably mounted on an upper end of
the first tube;

a second tube having a lower end retractably mounted on an upper
end of the lift tube, the second tube being formed with an elongated guide slot
having a lower end formed with a locking recess vertical to the guide slot;

10 a third tube having a lower end mounted on an upper end of the
second tube and an upper end formed with a slide hole;

a lower support rack having a first end secured on an upper end of the
third tube and a second end secured on a lower end of a backside of a
backboard;

15 a reduction motor secured on the lower support rack;

a drive roller mounted on and rotated by the reduction motor;

a driven roller secured on the lower support rack and located adjacent
to the drive roller;

a frame tube urged between the drive roller and the driven roller;

20 two opposite slide seats each mounted on the frame tube;

two opposite pulley members each secured on an upper end of the
backside of the backboard;

a pull handle slidably mounted in the guide slot of the second tube;
and

a pull cord secured on the pull handle and having two ends each
extended through the second tube, the third tube, the slide hole of the third tube
5 and a respective one of the two pulley members, and each secured on a
respective one of the two slide seats.

2. The basketball practicing and collecting device in accordance with
claim 1, wherein the lower end of the lift tube is mounted on the upper end of
the first tube by a first snap ring.

10 3. The basketball practicing and collecting device in accordance with
claim 1, wherein the lower end of the second tube is mounted on the upper end
of the lift tube by a second snap ring.

4. The basketball practicing and collecting device in accordance with
claim 1, further comprising an upper support rack having a first end secured on
15 the upper end of the third tube and a second end secured on the upper end of the
backside of the backboard.

5. The basketball practicing and collecting device in accordance with
claim 1, wherein the drive roller is made of rubber.

6. The basketball practicing and collecting device in accordance with
20 claim 1, wherein the driven roller is made of rubber.

7. The basketball practicing and collecting device in accordance with
claim 1, wherein when the pull handle is moved downward in the guide slot of

the second tube and locked in the locking recess, the pull cord is pulled downward by the pull handle to pull the two slide seats upward, thereby pivoting the frame tube to move upward, so as to stretch the frame tube, so that the backboard is compassed in the frame tube.

5 8. The basketball practicing and collecting device in accordance with claim 1, wherein the drive roller is rotated by the reduction motor, and the frame tube is held and urged between the drive roller and the driven roller, so that the frame tube is turned horizontally by rotation of the drive roller and the driven roller.

10 9. The basketball practicing and collecting device in accordance with claim 1, wherein the frame tube is a ring-shaped tube.

10. The basketball practicing and collecting device in accordance with claim 1, wherein the frame tube has a side formed with a ball inlet opening.

15 11. The basketball practicing and collecting device in accordance with claim 1, wherein the frame tube has a lower portion provided with an elastic net encompassing the backboard.

12. The basketball practicing and collecting device in accordance with claim 11, wherein the elastic net has a lower portion provided with a
20 collection channel.

13. The basketball practicing and collecting device in accordance with claim 11, wherein the frame tube is provided with a plurality of net hooks for hanging the elastic net.

14. The basketball practicing and collecting device in accordance
5 with claim 1, wherein when the pull handle is detached from the locking recess, the pull handle is moved upward in the guide slot of the second tube until the pull handle is stopped by the top end of the guide slot of the second tube, and the pull cord is moved upward by the pull handle to loosen and release the two
10 slide seats, so that the frame tube is pivoted to move downward, thereby detaching the frame tube from the backboard.

15. The basketball practicing and collecting device in accordance with claim 1, wherein the top end of the third tube is provided with two opposite pulley members for mounting the two ends of the pull cord.

16. The basketball practicing and collecting device in accordance
15 with claim 1, wherein each of the two slide seats is provided with an upper wheel and a lower wheel, and the frame tube is sandwiched between the upper wheel and the lower wheel.

17. The basketball practicing and collecting device in accordance with claim 16, wherein the upper wheel is made of rubber.

20 18. The basketball practicing and collecting device in accordance with claim 16, wherein the lower wheel is made of rubber.

19. The basketball practicing and collecting device in accordance with claim 1, wherein the base is a removable box.

20. The basketball practicing and collecting device in accordance with claim 1, further comprising a first support frame and a second support
5 frame mounted on the first tube, and the base is removably mounted on the first support frame and the second support frame.
